

US005997891A

United States Patent [19]

[11] **Patent Number:** **5,997,891**

Fuerst et al.

[45] **Date of Patent:** **Dec. 7, 1999**

[54] **MATERIALS AND METHODS UTILIZING A TEMPORARY VISUAL INDICATOR**

[75] Inventors: **Ronnie S. Fuerst**, Lexington, S.C.; **Richard Melker; Christopher D. Batich**, both of Gainesville, Fla.

[73] Assignee: **IPA, LLC**, Ft. Worth, Tex.

[21] Appl. No.: **09/135,768**

[22] Filed: **Aug. 18, 1998**

Related U.S. Application Data

[63] Continuation of application No. 08/674,069, Jul. 1, 1996, Pat. No. 5,837,645, which is a continuation of application No. 08/388,402, Feb. 14, 1995, Pat. No. 5,532,029, which is a division of application No. 08/242,517, May 13, 1994, abandoned, which is a continuation-in-part of application No. 08/061,412, May 13, 1993, Pat. No. 5,523,075.

[57] **ABSTRACT**

This invention relates to novel compositions containing temporary visual indicators and methods for using these compositions. Specifically, this invention relates to a sunscreen composition containing an indicator that is visible when the substance is applied to the skin, but becomes invisible shortly after application. The continued presence of the indicator allows the indicator to be reactivated temporarily to the visible form so that a user can verify the presence of the sunscreen. The visible indicator ensures that the sunscreen is applied evenly and completely to the area to be protected, but becomes invisible so as not to interfere with the action of the sunscreen or discolor the skin.
